OUR DISTINCTIVE MEDICAL CARE SERVICES

Bariatric Surgery

We have performed the following four types of bariatric surgeries

Roux-en-Y gastric bypass

Laparoscopic adjustable gastric banding

Sleeve gastrectomy

Duodenal switch with biliopancreatic diversion

Physical Therapy and Rehabilitation Center

Atatürk City Hospital A Block 1st basement floor

Surgical Oncology Clinics

General Surgical Oncology

Gynecologic Oncology

Brain and Neuro-Oncology

Uroncology

Thoracic Oncology

We have successfully performed all type of gastrointestinale (GIS) tumor surgery.

We also perform following tumor surgeries,

Transurethral Resection of The Prostate (TURP)

Transurethral Resection of Bladder Tumor (TURBT)

Lung tumor surgery

Liver tumors

Thyroid tumors

Pancreas tumors

Brain tumors

Gynecologic tumors

Radiation Oncology Center

Atatürk City Hospital H Block 5th floor.

We treat cancer patients by implement radiation to tumour tissues with two LINAC devices that we have.

Chemotherapy Department

Atatürk City Hospital H Block 1st floor

Hyperbaric Oxygen Therapy Center

Atatürk City Hospital A Block 2nd basement floor

Our center, with a total closed area of 320 meters square, has a very wide and comfortable physical conditions compared to other centers and offers a decent environment for our patients.

Hyperbaric Oxygen Therapy usage areas:

Soft tissue necrotizing infections (subcutaneous, muscle, fascia)

Crush injuries, compartment syndrome, other acute traumatic ischemia

Conditions in which wound healing is delayed (diabetic or non-diabetic)

Chronic refractory osteomyelitis

Excessive blood loss

Radiation necroses

Skin flaps and grafts with suspected contact

Thermal burns

Brain abscess

Anoxic encephalopathy

Sudden hearing loss

Retinal artery occlusion

Acute osteomyelitis of skull bones, sternum and vertebrae

Aseptic necrosis of bone

Sleep Disorder Unit

Atatürk City Hospital B Block 5th floor

Dialysis Center

Atatürk City Hospital B Block ground floor

Heart (Cardiology) and Cardiovascular Surgery Center

Atatürk City Hospital TB Block ground floor.

Emergency heart attack interventions, coronary angiography, angioplasty (balloon, stent), peripheral procedures (non-cardiac artery occlusions), cardiac pacemaker implantation and replacement procedures are performed.

Open heart surgery is performed. We have adequate Cardiovascular Intensive Care Units.

Burn Center

Atatürk City Hospital A Block ground floor.

Endoscopy Unit

Atatürk City Hospital D Block 1st basement floor

We have gastroscopes, colonoscopes and duodenoscopes in our unit. We performes colonoscopy, gastroscopy, rectoscopy, Peg (percutaneous endoscopic feeding tube) insertion, ERCP, liver biopsy, paracentesis, esophagus dilatation, emergency intervention for GIS bleeding, foreign body removal from the esophagus and stomach in the endoscopy unit.

Bronchoscopy Unit

Atatürk City Hospital C Block 5th floor.

Nuclear Medicine Center

We diagnose cancer cells and tissue through PET-CT and SPECT-CT that we have. Especially in the field of oncology (cancer), PET-CT is used for the purpose of detecting the tumor, determining the extent of tumor spread, planning radiotherapy, evaluating the response to treatment, and in some cases determining whether the existing mass is benign or malignant.

SPECT-CT ,Sentinel lymph node mapping, is used in the investigation of lymph nodes especially in breast cancer, malignant melanoma, head and neck tumors, early cervical cancer and bladder cancer.

Palliative Care Center

Atatürk City Hospital G Block 5th floor.

Algology Center (Pain Clinic)

Atatürk City Hospital F Block ground floor.

Our clinic provides medication and invasive interventional treatment in the operating room for chronic pain disorders.
